PROFILE

UX Designer | Politecnico di Milano Alumna

Adaptive and detail-oriented UX Designer with a robust foundation in Digital Interaction Design. Proven track record in conducting end-to-end research, wireframing, and usability testing for complex systems. I excel at distilling multi-dimensional data into clear, user-centric interfaces. Deeply passionate about AI-driven UX, I aim to leverage machine learning and contextual data to create the next generation of personalized digital products.

AI Focus: Agentic Memory & Perception • Function Calling & MCP •RAG Multimodal Data • Vibe Coding & Rapid Prototyping

EXPERIENCE

LEAD UX DESIGNER *(REMOTE)* — **NOV. 2024 - PRESENT**

LIBA SPACE — *California, United States*

Overseeing the end-to-end design lifecycle for the Nova AI Ecosystem (ConnectNova, JobNova, CrackInterview).

- **Design Leadership**: Directed the UX strategy and interaction framework; mentored a design intern on visual execution, UI refinement, and marketing assets to ensure brand consistency.
- **AI Strategy**: Pioneered conversational UX frameworks and multi-step AI reasoning flows, translating complex LLM capabilities into intuitive user journeys.
- **Research & Prioritization**: Conducted cross-product competitive analysis and user surfacing to define the MVP roadmap and feature prioritization.

KEY PROJECTS:

- **ConnectNova.ai (B-End Sourcing)**: Architected a Chrome-based AI ranking engine that automates LinkedIn candidate screening, transforming 3-hour manual searches into 5-minute ranked shortlists through deep profile analysis and natural language requirement mapping.
- **JobNova.ai (C-End Job Hunting)**: Led the UX for an all-in-one AI career hub, streamlining the flow from real-time job matching to AI-automated applications, focusing on data transparency and resume-JD score visualization to boost user trust and efficiency.
- **CrackInterview.ai (AI Mock Interview)** Designed an immersive Digital Human interview platform featuring conversational logic for 50,000+ scenarios, translating complex AI evaluations into visualized, actionable feedback dashboards for job seekers.

SKILLS

UX Design

- Data analysis
- Design Systems
- User Research
- Content Design
- Information Architecture
- Usability Testing
- Wireframing
- Prototyping

Tools

- Figma
- Protopie
- Maze
- Miro
- Dify & Coze
- Comfy UI
- No-code Tools

EDUCATION

MASTER, DIGITAL AND INTERACTION DESIGN

Politecnico di Milano
(2023 QS Art and Design Ranking: 6)

Sep 2022 – Jul 2025
Milano, Italy

PRODUCT DESIGN

Jilin University
(Leading national research university)

China

Interests

Scuba Diving
Climbing
Sci-fi *(books & films)*
Model kit assembly
Crochet

Languages

English(Fluent)
Italian(Beginner)
Chinese(Native)

INTERACTION DESIGNER *(INTERNSHIP)*

JUL. 2024 - SEP. 2024 . 2Ms

CRRC ROLLING STOCK RESEARCH INSTITUTE CO., LTD *Qingdao, China*

Conducted on-site ethnographic research and deep-dive interviews with maintenance crews to map complex workflows and identify critical friction points in the subway maintenance ecosystem.

- Re-engineered maintenance workflows and task allocation logic, achieving a significant reduction in operational redundancy and minimizing human error in high-stakes environments.
- Revitalized the system's information architecture and visual hierarchy to minimize cognitive tunneling, resulting in a more intuitive interface that ensures rapid response during maintenance tasks.

USER RESEARCH SPECIALIST

DEC. 2019 - JUN 2022 . 2.5Ys

BEIJING SMART WALNUT EDUCATION *Beijing, China*

Led user research and usability testing for an online education platform, developing user personas, journey maps, and testing strategies to inform design decisions.

- Spearheaded end-to-end user research initiatives—from persona development to NPS analysis—shaping the roadmap for brand health and media strategy.
- Transformed deep behavioral insights into high-impact product optimizations, resulting in a 15% increase in user engagement and significant boosts in key business conversion metrics.
- Architected an integrated data collection framework across the customer journey, leveraging granular user insights to drive hyper-personalized design and marketing strategies.
- Institutionalized a centralized research repository, streamlining cross-functional knowledge sharing and embedding a user-centric philosophy into the organizational DNA.

KEY PROJECTS:

- Walnut Programming Learning Path Optimization: Conducted large-scale user research for children aged 4–7 and 7–12, optimizing 50+ learning paths—resulting in a 20% improvement in study effectiveness and a 60% reduction in system errors.
- Purchase Behavior Analysis: Designed and launched new product features based on deep analysis of parental decision factors (e.g., price, experience, tutor quality, learning style, service), driving a 30% increase in sales.

UX DESIGNER

NOV. 2015 - DEC 2019 . 4Ys

SOHU.INC *(LEADING CHINESE TECHNOLOGY COMPANY)* *Beijing, China*

- Designed key interaction flows for Sohu's social media platform Huyou, focusing on feed streams and instant messaging modules to enhance user engagement.
- Independently designed and launched Sohu Moke, a social tool that achieved 3,000+ daily active users post-launch.
- Restructured the user account system and database to support real-name verification and account consolidation, improving backend scalability and user management.
- Contributed to defining, documenting, and maintaining Sohu's interaction design principles and standards across product teams.
