

Mei Chai

Product Designer · AI-Powered & Design-System-Driven Product Experiences
Milano, Italy | +39 379 2076 803 | mei.chai@mail.polimi.it | LinkedIn | Portfolio | GitHub

PROFESSIONAL SUMMARY

Product Designer with 7+ years of end-to-end design experience, specialized in translating complex systems and AI capabilities into simple, intuitive user experiences. Proven track record designing and shipping AI-powered products from research through high-fidelity Figma prototypes to production code. Deep fluency in building and maintaining scalable design systems (components, libraries, variables) across multi-product portfolios. Comfortable owning ambiguous, rules-heavy problem spaces independently — from user research to deployment — with a collaborative, low-ego approach to working across design, engineering, and product.

KEY SKILLS

- AI-Powered Product Design** — Designing and shipping AI-native products end-to-end (conversational UX, agentic workflows, RAG-based interactions); portfolio spans three live AI products
- Figma & Design Systems** — Hands-on, advanced Figma practitioner: components, libraries, variables; maintained design-system consistency across multiple concurrent products
- User Research & Usability Testing** — Ethnographic research, interviews, persona/journey mapping, usability testing, NPS analysis; turning findings into prioritized design decisions
- Cross-Functional & Technical Collaboration** — Working fluently with engineering as a technical peer; shipping front-end (and back-end) code directly via AI coding agents (Cursor, Lovable) and Supabase/Cloudflare

PROFESSIONAL EXPERIENCE

- Lead UX Designer (Remote)** | Liba Space

Nov 2024 – Present

Design-to-code ownership of the Nova AI Ecosystem (ConnectNova, JobNova, CrackInterview)

 - Directed UX strategy and interaction design across three concurrent AI products, using Figma Make and MCP workflows to maintain a single, scalable design system across all three
 - Designed and shipped AI-powered product experiences — conversational UX, multi-step reasoning flows, and a visualized feedback dashboard (CrackInterview) — from concept maps and high-fidelity prototypes through to production front-end code
 - Collaborated as a technical peer with engineers, applying hands-on knowledge of RAG pipelines, agentic workflows, and prompt engineering to bridge design intent and AI system behavior
- Product Designer & Full-Stack Engineer** | DEF Beauty (Milano)

May 2026 – Present (Part-time)

 - Independently owned research, design, and full-stack development for the rebuild of a wholesale distributor's order-management platform — creating simple, intuitive experiences in a space with complex rules and workflows Identified data fragmentation as the root cause of order errors and shipped a real-time sync fix that cut the ordering flow from 5 steps to 3
 - Designed and implemented a role-based access system (four distinct roles, each scoped to relevant data and actions) to support secure, structured multi-user operations
 - Delivered the entire system solo — research, design, front-end, and back-end (Supabase, Cloudflare Workers) — demonstrating full ownership from problem discovery to deployment
- Interaction Designer (Internship)** | CRRC Rolling Stock Research Institute

Jul – Sep 2024

 - Conducted on-site ethnographic research with subway maintenance crews to map complex technical workflows and identify friction points
 - Redesigned information architecture and visual hierarchy to reduce cognitive load, enabling faster, clearer decision-making in a high-stakes technical environment
- User Research Specialist** | Beijing Smart Walnut Education

Dec 2019 – Jun 2022

 - Led end-to-end user research (personas, journey mapping, NPS) that shaped product roadmap decisions, driving a 15% uplift in user engagement
 - Applied large-scale research to optimize 50+ product learning paths, improving effectiveness by 20%
- UX Designer** | Sohu Inc.

Nov 2017 – Dec 2019

 - Defined and maintained interaction design standards across multiple product teams, establishing a consistent design language at organizational scale
 - Independently designed and launched a social product from zero to 3,000+ daily active users

EDUCATION

- MSc Digital and Interaction Design | Politecnico di Milano (2022 – 2025)
No-Code AI & Machine Learning: Building Data Science Solutions | Professional Development (2025)
BA (Equivalent) | Jilin University (2017)
